

**These whistles are not toys** and should not be distributed to young children who might not understand the distinction between using a whistle for defensive / alerting purposes vs using one for fun.

These whistles must **never** be given to children 3 or younger, as they present a choking hazard.

These whistles are **LOUD!** In situations where sustained use is anticipated, be sure to wear hearing protection. Never blow a whistle into someone's ear, as this may result in significant damage to hearing.
